### Author

*Biography from Once upon a Tooth... a Fairy's Tale:*

My grandmother taught me to read when I was two, and it was always the stories that enthralled me, never the lessons. In elementary school, I was the playground storyteller often telling stories for the expressed purpose of frightening the other kids.

Over the course of years, I've used my Master's Degree in English for many paying jobs that did not include storytelling, but my heart is always in the weaving of a tale.

### Illustrator

*Biography from Once upon a Tooth... a Fairy's Tale:*

I remember hot summer afternoons sitting in front of the book shelf reading through encyclopedias, fairy tales, poetry, mythology, and a set of Childcraft books. Though I loved the stories, it was the art that moved me.

When I finally decided, at about fifty, it was time to figure out what I wanted to do when I grew up, I knew-- use that Design Degree from LSU to begin my career as an artist.

FOR IMMEDIATE RELEASE

## **Finally — A Children's Book That Says Something Good About Being Human! *Tired of all those children's books that talk about all the things we do wrong?***

HOUSTON, TEXAS -- Sept. 8, 2010 -- Vickie Adair, MA, a Houston writer with a long history of professional writing and teaching university writing classes, has come to the rescue with *Once Upon a Tooth: a Fairy's Tale* — an enchanting new children's book with some very positive things to say about growing up human from a fairy's perspective.

Readers follow a brave young fairy, Eeling, on an exciting adventure as she seeks to discover the truth about the human species. Presented in an array of colorful sketches by Louisiana artist Charlene Bostick, Bachelor of Arts, the book provides children with a sense of their personal worth and magic, as well as, a sense of the dignity and happiness to be found in such mundane things as chores and aging.

Children learn through Eeling's years in the human village and her friendship with Susie, a young human child, that humans have a magic unknown to the fairies — the magic of love. Adair's and Bostick's newly released children's book is based on the sister's childhood years growing up together and their years of raising, teaching, and loving children.
